
NERAK HEAVY DUTY PENDULUM ELEVATORS

PENDULUM BUCKET ELEVATORS SIZE XXL

NERAK
FÖRDERTECHNIK

EXPERTS IN VERTICAL CONVEYING

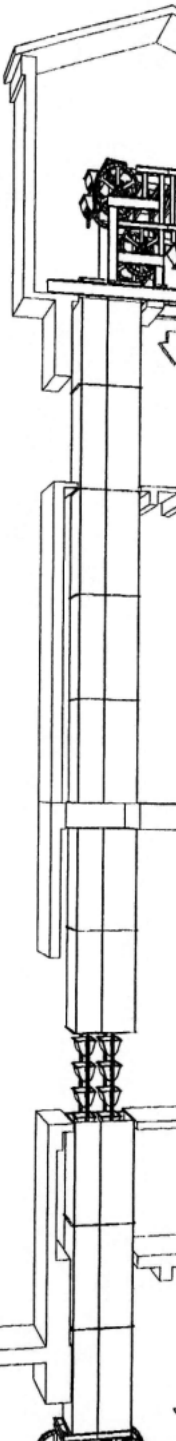

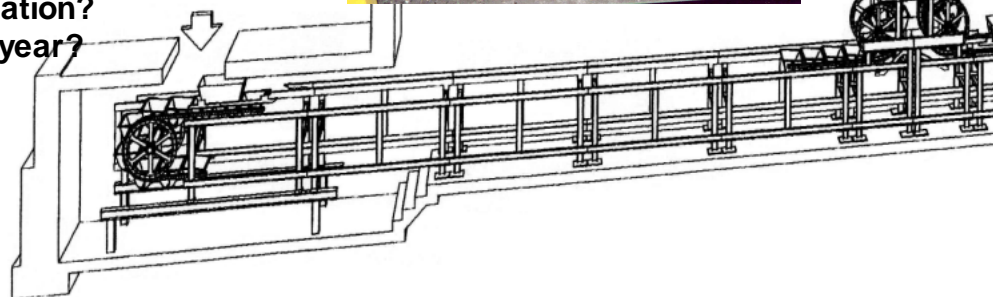

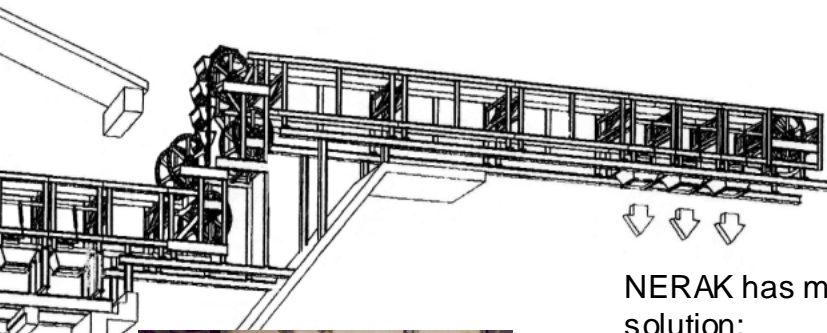

For hundreds of years people have used pendulum bucket elevators to lift materials to several discharge points. This has led to the invention of a thousand different variations.

Why then have NERAK now invented the 1001st variation of a pendulum elevator?

For simple tasks there are many different pendulum elevators on the market.

- But, for rough, extremely abrasive products?**
- For particle sizes up to 300 mm?**
- For capacities over 80 m³/h?**
- For combined horizontal & vertical conveying of more than 60 m?**
- For round the clock operation?**
- Day after day, year after year?**

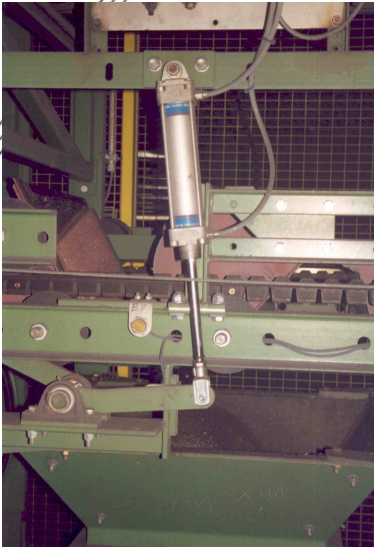

NERAK has met this challenge with an impressive solution:

The NERAK size XXL pendulum elevators.

- Heavy-duty buckets made of wear resistant steel with roller bearings
 - Overlapping in the horizontal
 - Very robust design for the casing (a dust tight version is also available)
- And of course, as always at NERAK - rubber block chain - the high tensile driving element, without links, silent and maintenance free.

The series PB XXL represents the quality end of pendulum bucket elevator design.

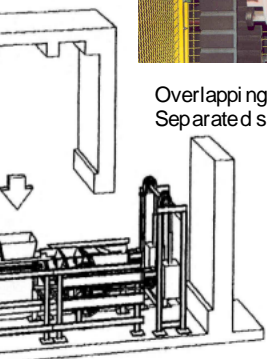

Come to NERAK for a solution to your conveying problem – quality assured success!

Pneumatic tipping unit

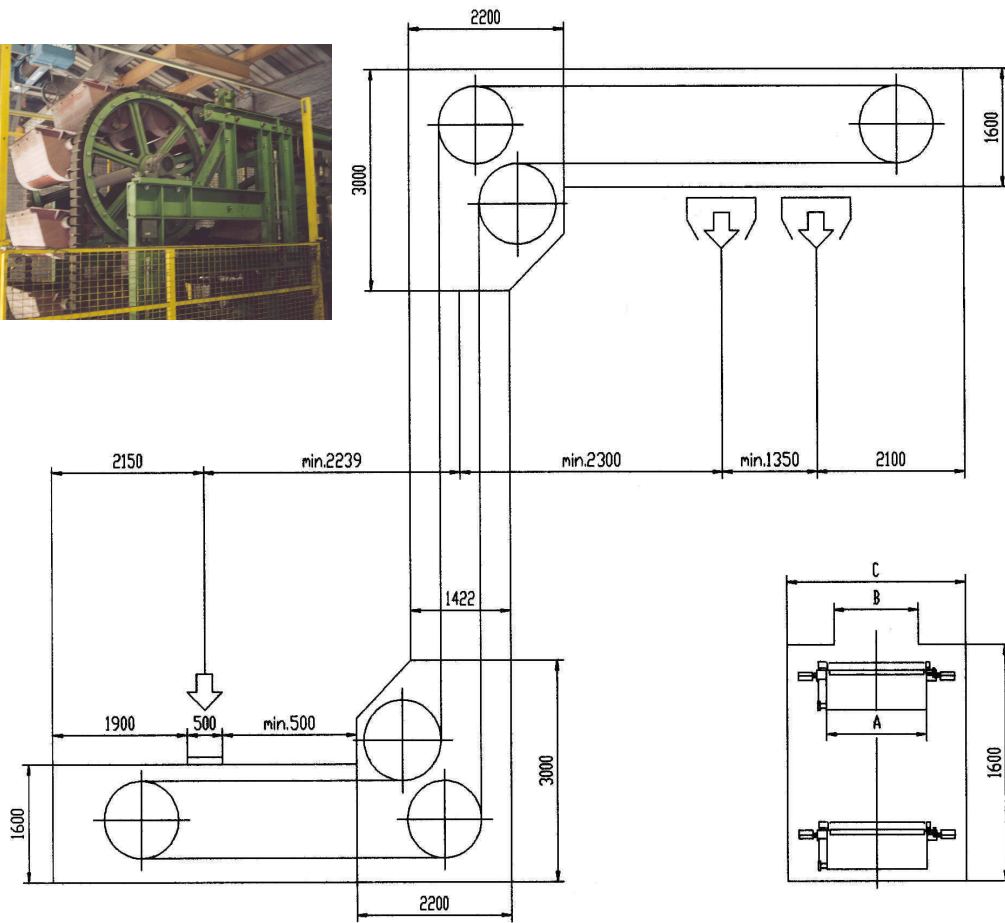

Overlapping buckets in the horizontal,
Separated single buckets in the vertical.

Drive unit

DIMENSIONS

Capacity	80 m ³ /h	100 m ³ /h	120 m ³ /h
Type	PB XXL 700	PB XXL 900	PB XXL 1100
A [mm]	710	910	1060
B [mm]	600	800	950
C [mm]	1270	1470	1620
